

WESTERN DIGITAL CORPORATION
WD1007V-MC1

Data bus:	16-bit, MCA PS/2 system
Size:	Full-length card
Hard drives supported:	2 ESDI drives
Floppy drives supported:	None

CONNECTIONS	
Function	Location
20-pin data cable connector-drive 1	J2
20-pin data cable connector-drive 2	J3
34-pin control cable connector-hard drive	J4

MISCELLANEOUS TECHNICAL NOTES	
There are no user-configurable jumpers on the WD1007V-MC1, all configuration is done through the firmware. Each WD1007V-MC1 board can support two hard disks. If two WD1007V-MC1 boards are installed in a PS/2 system only one drive may be attached to each controller. (i.e.: you can never have more than a maximum of two hard drives in a PS/2 system, no matter how many controller cards are installed.) The ESDI drive is always assigned to C:.. If you have one ESDI and one ST506/412 drive, the MCA architecture always selects the ESDI drive as drive C:..
