DEFAULT CONFIGURATION TOGGLE	
Purpose	JP3
Configuration default toggle first position	Pins 2 & 3 closed
Configuration default toggle second position	Pins 1 & 2 closed
Note: This toggle functions as a clearing of the firmware on the board. If the jumper is first on Pins 2 & 3 then changing this jumper to Pins 1 & 2 will cause the firmware to be erased and default values to be loaded. This will then stay until the jumper is moved again.
